

Roberts 38 Offshore

Are you looking for a 'Great Escape' this is one of the best looked after boats I have seen. The current owner has spent years sailing around the islands in Queensland, New Zealand, and in our local coastal waters living onboard for over ten years. 'Great Escape' shows no sign of wear, the hull and rigging are in great order it is very comfortable well maintained and well laid out. The master Cabin has a huge bed fit for a King the V- Berth has two single beds, the kitchen is almost a separate room making it a very functional working area and a great uses of space. The walk through to the master cabin is the control room with all your navigation instruments. Plug in for laptop printer etc. The Roberts design is a sort after boat for off shore cruising this boat boasts all you need to make it happen.
